

ABSTRACT

Handheld electric beater-mixer includes a body (2) containing an electric drive motor (6), two rotary coupling devices (20, 33) which are connected to the shaft (8) of the motor and which are adapted to receive, via respectively two engagement passages (26, 43) opening from the body (2), a whisk (10) and, respectively, a mixer foot (45), and a safety device (55) adapted to prevent the simultaneous emplacement of the whisk and of the mixer foot. The safety device (55) includes a movable mechanical member (57) adapted to block selectively one or the other of the two passages (26, 43) for engagement of the whisk (10) and of the mixer foot (45).
